

Data Platforms Update

New Horizons 2019

www.mysideeq.org

- Target Audience: Patients and Caregivers (GIST and other cancers).
- Purpose: To allow users to track their disease, medications, and side effects, and see how they impact quality of life. Also allows for viewing and posting of tips. Enables us to:
collect data that will contribute to personalized side effect management.
- Scope: Global, currently over 400 users signed up.
- Status: Launched; Data collection underway

Answer to Question - "Which One of Your Side Effects Concerns You the Most?"

By Gender
Data Pulled 12 Apr 2019

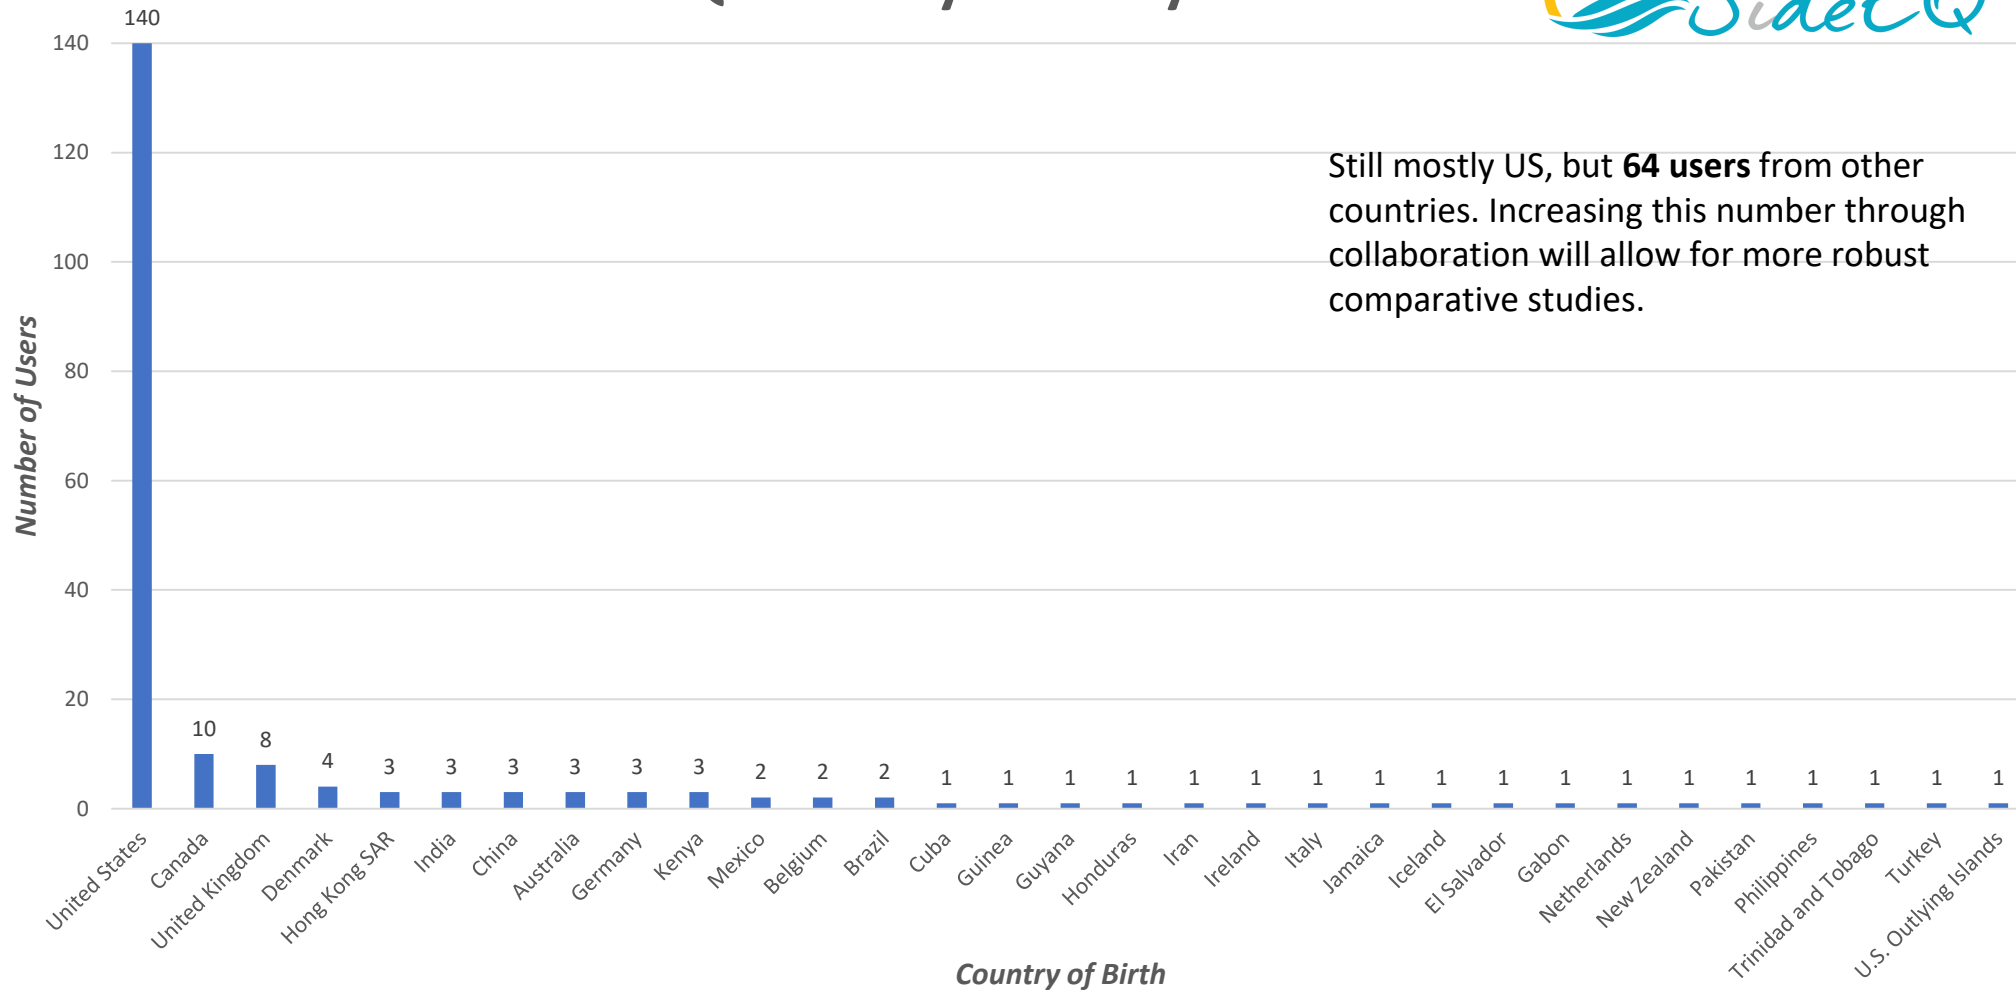

In the Last 7 days, How Much Have Your Side Effects Interfered With Your Ability To Take All Of Your Medication As Prescribed?

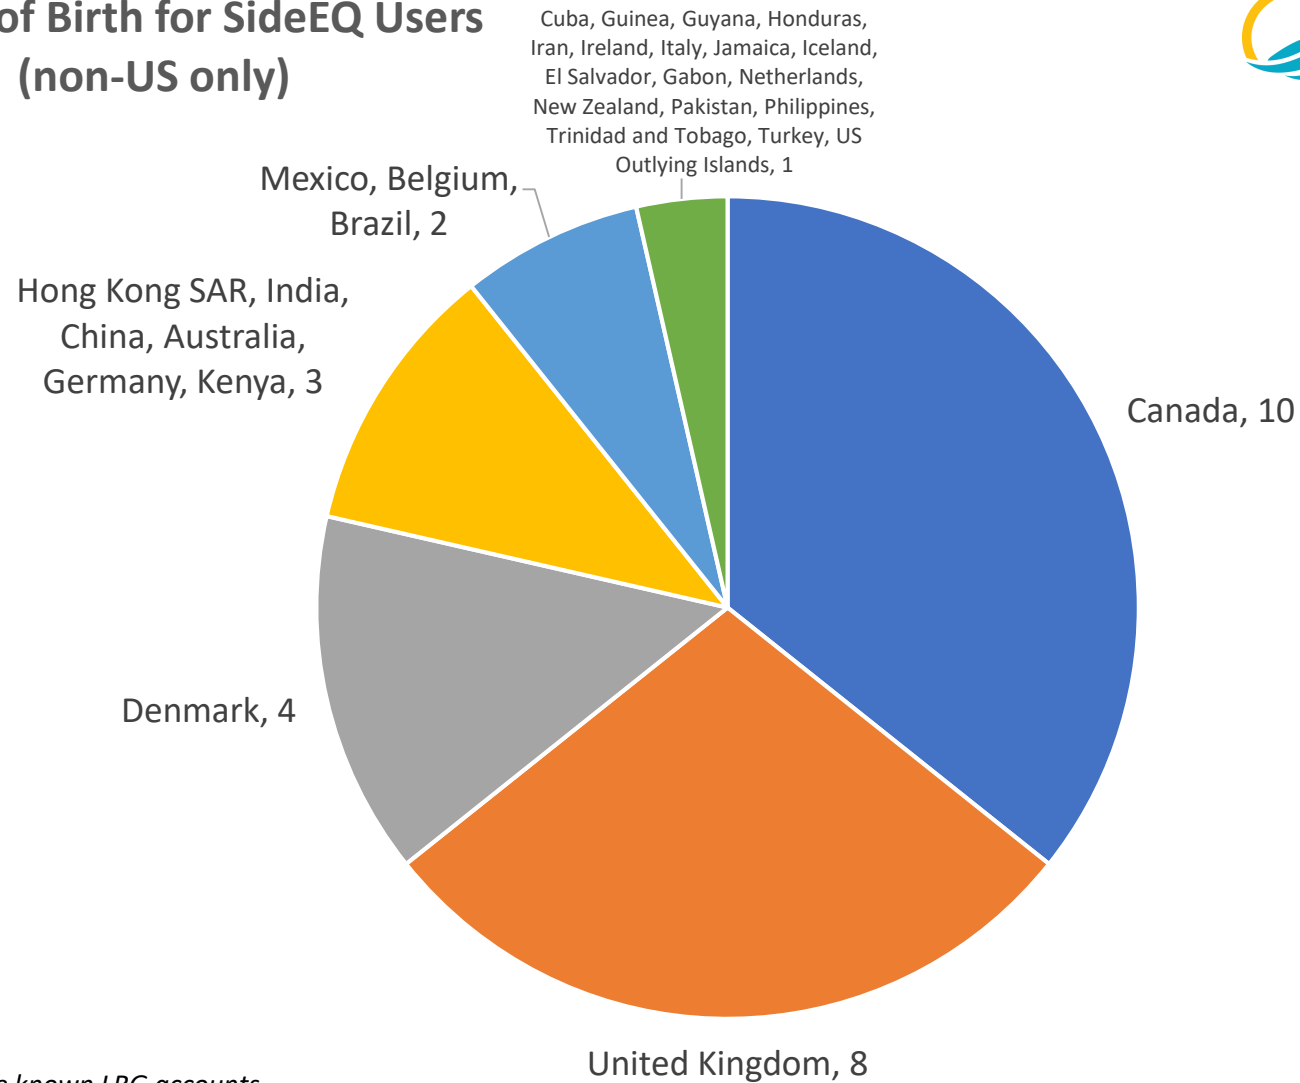

SideEQ Users By Country of Birth

Still mostly US, but **64 users** from other countries. Increasing this number through collaboration will allow for more robust comparative studies.

Country of Birth for SideEQ Users (non-US only)

Does not include known LRG accounts

Data pulled 26 Apr 19

www.projectsurveillance.org

- Target Audience: GIST HCP's (Oncologists, Surgeons, Pathologists)
- Purpose: to act as a sentinel system that provides information about unique and interesting cases, and:
collect data that can lead to collaborative follow-up investigations/studies
- Scope: Global, currently over 50 HCP's signed up
- Status: Early phase; Data not yet collected
